Selection Criteria

Please address the following 3 criteria:

Quality and Relevance

- Clearly describe the objectives and methodology to be employed with the project. The alignment with strategic priorities and the objectives of the funding scheme will be considered in combination with the soundness of the concept and credibility of the proposed methodology.
- Explain how the participants in the research team will bring together the necessary expertise to carry out the project. The 2-page CVs of the Chief Investigators will be taken into consideration.

Execution

- Elaborate on the workplan and milestones outlined in the timeframe (there are separate sections in the application form for an outline of activities in the Timeline and Budget). Proposed timeframes and budget estimates should be realistic and appropriate.
- The long-term plan for engagement to attract research funding and produce publications will be taken into consideration.
- This section should also address the appropriateness of the allocation of tasks, ensuring that all participants (including PhD students, postdocs, Early and Mid-Career Researchers (EMCR), and any researchers on Sabbatical Leave) have a valid role and there are adequate resources in the project to enable them to fulfil that role.

Impact

- Outline what the participants will gain from the project and how it will contribute to the discipline and field of research.
- Explain how the project will establish or strengthen a durable cooperation between the universities and participants.
- Explain how the project will impact beyond the academic sphere (i.e. benefit society, address global challenges, [Sustainable Development Goals](#), etc.).
- Explain how the project activities and results will be communicated to different target audiences.

The sections for responses to the criteria above are limited to 300 words each
