Backend Engineer Contractor at ViralMoment

ViralMoment is looking to hire a full-time contractor for a backend engineering role to build out the second iteration of our web-app backend. Interesting parties can email sheyda@viralmoment.com with a resume and/or portfolio

Duration of hire: 3-6 months

What you'll be working on:

- Implementation of the second iteration of web-app backend
- Implementation of logging and alerting in the backend
- Adhoc bug fixes

Required qualifications:

- 3+ years experience as a backend developer
- Experienced with Python (Django experience a plus)
- Experienced with Postgresql
- Experienced with AWS deployment (ElasticBeanstalk, ECS, S3, Lambda)
- Familiarity with Airflow a plus
