Patents include only utility patents granted during the 2023 calendar year. All assignees are credited for patents when listed. The number of patents granted does not necessarily indicate the value of a university's technology, the effectiveness of its research, or whether its patents will be successfully licensed and/or brought to market. **This is a dynamic list of worldwide institution patents.** Some universities may record patents under different, yet similar names or combine their patents under one foundation or trustee name.
