

Behind the Science

A Cancer Research Forum from Moore's Cancer Center

MAY 25TH
12P - 1:30P
ZOOM

Moore's Cancer Center is delivering discoveries everyday to prevent, treat, and improve cancer outcomes.

Topics include:

- Breast cancer complexities one cell at a time
- Cannabis use in cancer patients
- Early diagnosis & treatment of cancer spreading to the spinal fluid
- Why cancers become drug resistant
- Multiple myeloma clinical trials

We welcome *everyone in the community* to participate and learn more about our cancer discoveries.
