Note: Federal Bureau of Investigation (FBI), “NICS Firearm Checks: Month/Year by State and Type.” Everytown estimated the number of firearms sold for each month and year using the same methodology used by the Small Arms Survey. Based on surveys of retailers, Small Arms Survey estimates that 1.1 firearms are sold for each handgun and long gun check, and 2 firearms are sold for each ‘multiple’ check conducted. The state-level numbers are as provided by the FBI and the sum of these numbers do not equal the US totals that the FBI provides in their reporting. Everytown also excluded the US territories from this analysis.
