

Request for Letters of Intent

Mentored Investigator Grant

2024 Grantees

Purpose

Ovarian Cancer Research Alliance is requesting Letters of Intent for the 2024 Mentored Investigator Grant (MIG) (formerly called the Ann Schreiber Mentored Investigator Award). This grant provides funding for trainees who are working under the supervision of a mentor who is a recognized leader in the field of ovarian cancer research, or relevant area.

Eligibility and Selection Criteria

1. Applicants must be either clinical fellows or post-doctoral fellows with protected time to do the proposed work. Candidates for this grant must have an MD/DO and/or PhD degree at the time of submitting the LOI.
2. Applicants must be working in institutions with well-developed ovarian cancer research programs, in a school of medicine or public health, or a recognized non-profit scientific research facility.
3. Applicants should be involved in either laboratory, clinical, epidemiologic or health services research. The research leader who will serve as the mentor should have significant independent cancer research funding (NCI, DOD, OCRA, etc.).
4. Submissions may only have one mentor listed. Each mentor may support only one applicant per year. We encourage research groups to vet concepts so that only one LOI is submitted for this grant. Mentors must be at the same institution as the applicant.
5. PhD applicants must be no more than 5 years out of their terminal degree at time of application (e.g. terminal degree must have been awarded during 2018 or later); MD/DOs and MD/PhDs must be currently enrolled in a fellowship program.
6. This year OCRA intends to prioritize funding for at least one proposal that spans the entire range of Cancer Control and Population Sciences (CCPS), including (but not limited to): risk and outcome studies, survivorship, and health services research.
7. The selection committee will consider the strength of the research environment and project proposal, the trainee's prior academic track record, and the likelihood of them pursuing a research career dedicated to ovarian cancer. Ideally, the project proposed should be one that the trainee's mentor believes will advance the overall scientific objectives of the research group. Proposed projects should focus on ovarian cancers and/or related gynecologic cancers.
8. Although the trainee may take part in some non-research activities (e.g. class work, clinical activities), at least 80% effort should be devoted to research during the tenure of the OCRA grant.
9. International applicants are welcome to apply.

10. If invited to submit a full proposal, applicants will be required to provide a minimum of 1 letter of recommendation from someone in a position to mentor the applicant.

If you have questions about your eligibility, please contact us (see last page).

Terms of Grant

The Mentored Investigator Grant provides a total of \$75,000USD to be used over one or two years. MIGs have an anticipated start date of March 1, 2024. Grant recipients will be required to submit activation deliverables and annual progress reports (narrative and financial) throughout the life of the grant. Each applicant may submit only one LOI per grant cycle. Grant recipients may only receive OCRA's Mentored Investigator Grant once.

It is the mentor's responsibility to assure that a trainee who receives this grant submits the required activation material and progress reports (narrative and financial) throughout the life of the grant. Any publications or presentations of work resulting from this grant should acknowledge support from OCRA.

Selection Process

Letters of Intent will be reviewed by the Ovarian Cancer Research Alliance's Scientific Advisory Committee (SAC), which is comprised of distinguished members of the medical, research and patient advocacy community from across North America. The majority of LOIs will be triaged at this stage; only a fraction of those submitting LOIs will be invited to submit full proposals.

We recognize that preparing a full application requires a significant amount of time and energy for investigators, and we believe this process will ensure that only those applications most likely to be competitive will advance to the final round of selection.

Timeline

The submission deadline for LOIs is 5:00pm ET on March 29, 2023. Late submissions and extension requests are not permitted. All applicants will be notified of their status in mid - May. Please be sure to add OCRA@smartsimplemailer.com to your safe sender list in your email so you can get all emails from the system. For those selected to submit full proposals, full proposals will be due in early June 2023.

Application Process

Letters of Intent must be submitted in English via the SmartSimple website (<https://ocra.us-1.smartsimple.com/>) by 5:00pm ET on March 29, 2023.

The SmartSimple website is easy to use and will lead you through the completion of the LOI. We recommend you log into the website soon and familiarize yourself with the website as well as the required parts of the LOI.

Beyond basic contact information about yourself, and your mentor, LOIs must include the following:

1. **Scientific Abstract** -Summary of the proposed research project, which should be presented in 6,000 characters or less (including spaces). Text only; figures, images, and graphs are not permitted.
2. **BioSketches** -- Current NIH biosketches for both trainee (PI) and mentor are required. Please use the NIH Biosketch template available for download in SmartSimple and adhere to its instructions and space limitations.
3. **Budget** -- Requested total budget amount. A detailed budget is not required during the LOI; only an estimated total budget request is required at this time.
4. **Grant Length** – The application needs to select if they would like the grant active for 1 or 2 years.

Answers to frequently asked questions about the application process are available online [here](https://ocrahope.org/research/for-grantees/grant-application-faq/) (<https://ocrahope.org/research/for-grantees/grant-application-faq/>).

Technical Support

If you are having technical problems with SmartSimple please email OCRA – grants@ocrahope.org. SmartSimple works best when using Google Chrome. Be sure your pop ups are not blocked on your web browser as some items will open a new window.

Questions about the substantive aspects of the application should be directed to Kristin McGowan (contact info below).

About OCRA

Ovarian Cancer Research Alliance (OCRA) is the leading organization in the world fighting ovarian cancer from all fronts, including in the lab and on Capitol Hill, while supporting women and their families. Visit ocrahope.org to learn more.
