

# COVID-19 Vaccination Administration Overview

## POPULATION

### Phase 1 Limited Vaccine Supply

- 1A** Healthcare workers identified as high-risk, including those most likely to be exposed to COVID-19 at work because of their care environment, their role, and the nature of their contact with patients.
- 1B** Additional healthcare workers, including those working in settings where patients are seen, essential workers, and some high-risk patient populations as identified by public health officials.

### Phase 2 Increased Vaccine Supply

Continued vaccination of Phase 1 populations. High-risk populations as identified by public health officials. Potentially limited access for general population.

### Phase 3 Broad Vaccine Supply

Routine vaccination of the general population.

*Reflects current guidance from public health officials.*

*This material is for informational purposes only and may not include all populations identified for each phase.*
