

THE UNIVERSITY OF ARIZONA
UA SCIENCE

**MT. LEMMON
SKYCENTER**

You are invited to join us Saturday, March 13, 2021 For our annual Messier Marathon

This year the Messier Marathon will be a virtual event for amateur astronomers and sky-gazers around the world to observe as many objects as possible (out of 110) from the [Messier Catalogue of Nebulae and Star Clusters](#) in a single night.

This year the event will be virtual!
6:00 pm – 6:00 am (MST) | Arizona time

REGISTER NOW

We will be live-stream images of the objects throughout the night from our 32" Schulman Telescope, accompanied by interesting information on the Messier objects, guest presentations on related topics, and other exciting astronomical information over the course of the entire night, until dawn.

We hope you will consider making a suggested \$25 or greater donation. All donations made in support of this event will benefit the Mt. Lemmon SkyCenter, where we engage people of all ages in the process of scientific exploration as we foster a deeper understanding of our Earth within the Universe.

[Donate to the Mt. Lemmon SkyCenter](#) it is greatly appreciated.

We are looking forward to you joining us for an exciting evening of observing.
