

FRIDAY SCIENCE SEMINAR

Feeding the flames: new invaders and previous burns drive fire behavior in western forests

With Dr. Claire Tortorelli

This talk explores how fuels influence fire in western forests. The recently introduced invasive annual grass, *ventenata*, exacerbates fire in dry pine forests, while previous burns moderate future fire severity across the west.

FEBRUARY 28, 2025
3:30 - 5:00 PM

SCIENCE HALL AUDITORIUM
(ROOM 151)
