PDMA Pittsburgh Happy Hour

3/11

12th LDV Vision Summit (free virtual event)! See description below:

Since 2014, the Annual LDV Vision Summit has been the premier global event for visual tech and AI, featuring top speakers from tech giants, innovative startups, esteemed research labs and leading VC firms. Our 2026 lineup includes experts from the University of Oxford, Mayo Clinic Platform, Bek Ventures, Insight Partners and more. We're thrilled to welcome Dr. Jan Erik Solem – a visual technology and artificial intelligence visionary. We'll also hear from Dick Costolo, a serial entrepreneur with three exits and former Twitter CEO who led the company through its IPO, sharing insights and lessons on building and backing transformative companies.
