

# HST/BST Fire Alarm System

## Tower Levels (HST 8–19)(BST 5–9):

Only the floor in Alarm, one floor above and one floor below the floor in alarm must evacuate immediately.

All three floors will hear the following voice message:

*Sirens "May I have your attention. May I have your attention please. A fire alarm has been reported in your area. Please evacuate the area using the nearest exit or stairway. Do not use the elevators." Sirens*

All other floors in the building will hear an alert tone and the following voice message:

*Alert Tone "May I have your attention. May I have your attention please. There has been a fire alarm reported in another area of the building. Please stay in place and await further instructions." Alert Tone*

## Network Levels (HST 1–5)(BST 1–4):

Only the floor in alarm must evacuate.

The following voice message will be heard:

*Sirens "May I have your attention. May I have your attention please. A fire alarm has been reported in your area. Please evacuate the area using the nearest exit or stairway. Do not use the elevators." Sirens*

All other floors will hear an alert tone and the following voice message:

*Alert Tone "May I have your attention. May I have your attention please. There has been a fire alarm reported in another area of the building. Please stay in place and await further instructions." Alert Tone*
