

SMART Goals for Visual Art in the 2020-2021 school year:

- Schools will implement the SLPS Visual Art Curriculum with fidelity, leading all students to create and display one artwork for every two weeks of instruction throughout the 2020-21 school year.
- Each artwork will exemplify the 21st Century Skills of critical thinking, creating, communicating, and collaborating and will demonstrate understanding of the art medium, technique, and the elements and principles of art.
- Instruction units will be accessible virtually and in schools and use student friendly, clear, and appropriate directions.
- Schools will provide all students with at least two opportunities for community engagement in their schools, neighborhoods, and city through student art displays, contests, supports of businesses and non-profit institutions, or field trips (virtual or brick and mortar) to arts institutions by the end of the 2020-21 school year.
