

# RESPIRATORY VIRAL & GAS (THROAT/ETT) ILLNESS ACTIVITY WEEKLY REPORT

**Prepared by Infection Prevention & Control** 

### Respiratory Viral & GAS (Throat/ETT) Illness Surveillance

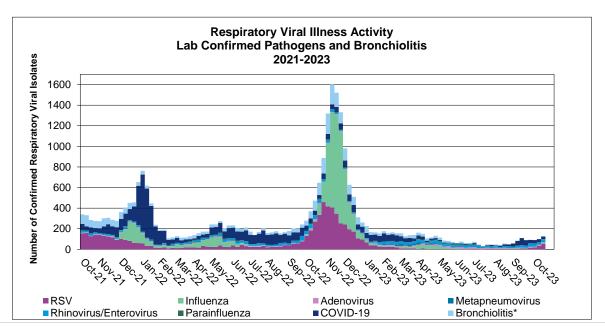

- Lab confirmed pathogen surveillance data includes Minneapolis and St. Paul:
  - Inpatients
  - Emergency departments
  - Primary care clinics
- Bronchiolitis surveillance begins Oct. 1 and excludes patients with viral testing, chronic conditions, asthma, and pneumonia diagnoses.
- All data are preliminary and may change.
- Lab confirmed pathogen surveillance and bronchiolitis surveillance exclude ambulatory sites not using Cerner: Partners in Pediatrics, MetroPeds, Hugo, West St. Paul

#### **Respiratory Viral Illness Activity**

Total # of lab confirmed cases this week = 125

<sup>\*</sup>Bronchiolitis data is pulled using ICD-10 coding and is delayed by a few weeks.

Last Updated: 10/23/2023

#### SEASONAL GRAPHS

#### Respiratory Viral Illness Activity: Seasonal

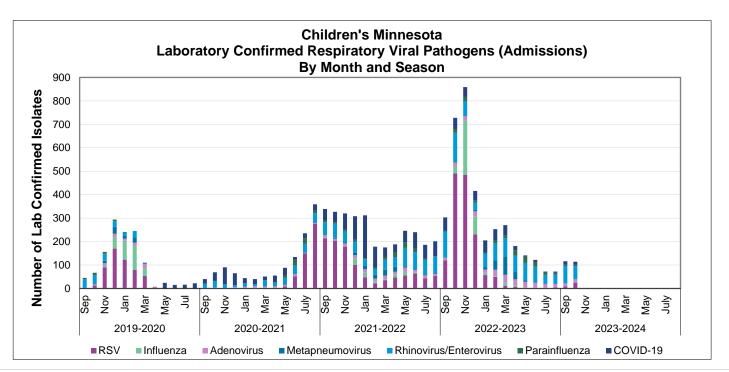

A 4-plex test was introduced in December 2020 which includes COVID-19, RSV, and Influenza A/B. Providers have the option to remove RSV from this test. COVID-19 admission testing started in June 2020 and ended November 2022.

Note: Data includes all positive isolates and therefore may be an over-representation of patients with respiratory illness. At Children's MN in the past year, 7-19% of isolates received in lab had mixed infections. This percentage differs each month.

#### WEEKLY GRAPHS

# Respiratory Viral Illness Activity: COVID-19 PCR

Total # of lab confirmed cases this week = 30

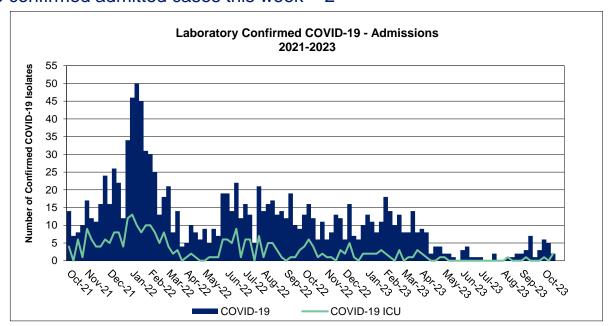

Note: COVID-19 admission testing started in June 2020 and ended November 2022.

# Respiratory Viral Illness Activity: COVID-19 PCR (Admissions)

Total # of lab confirmed admitted cases this week = 2

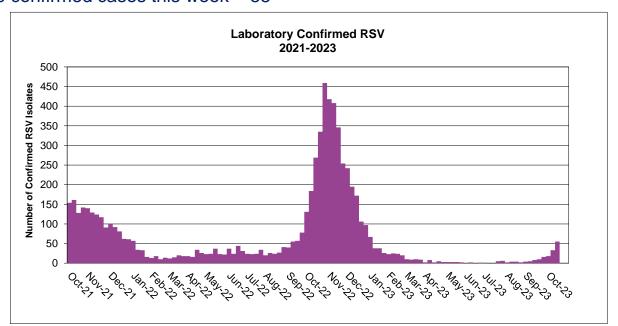

Note: COVID-19 admission testing started in June 2020 and ended November 2022. COVID-19 positive tests among admitted patients. COVID-19 may or may not be the reason for admission.

# Respiratory Viral Illness Activity: Respiratory Syncytial Virus

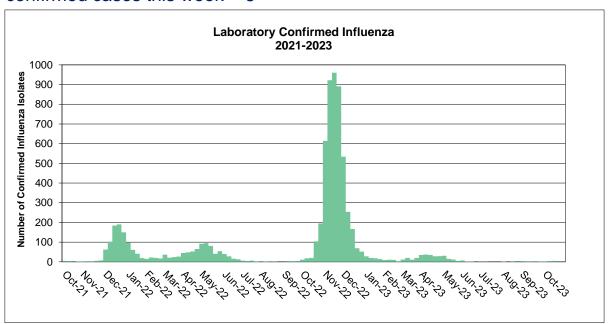

Total # of lab confirmed cases this week = 55

### Respiratory Viral Illness Activity: Influenza

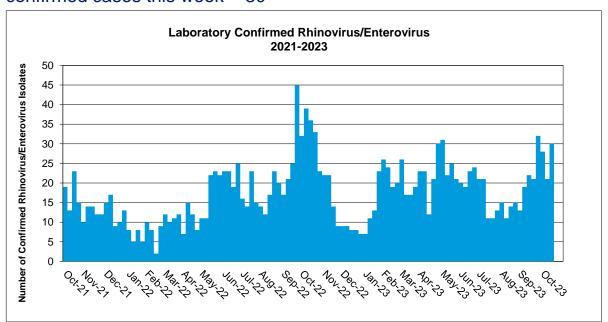

Total # of lab confirmed cases this week = 5

# Respiratory Viral Illness Activity: Rhinovirus/Enterovirus

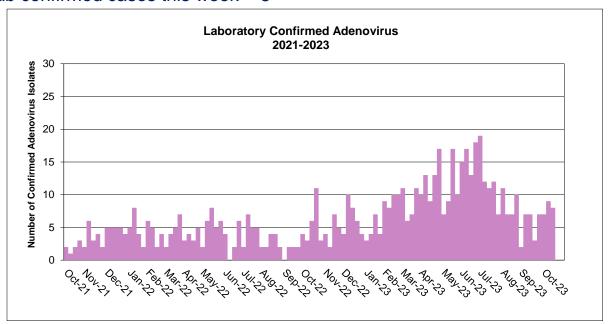

Total # of lab confirmed cases this week = 30

# Respiratory Viral Illness Activity: Adenovirus

Total # of lab confirmed cases this week = 8

# Respiratory Viral Illness Activity: Metapneumovirus

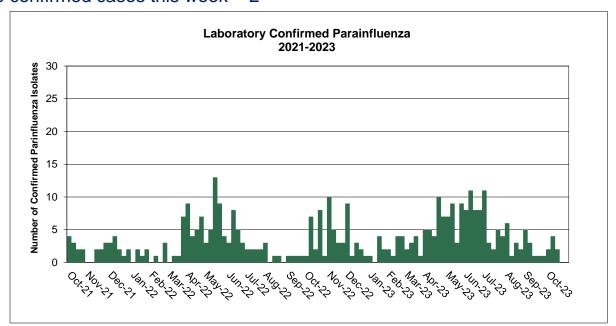

Total # of lab confirmed cases this week = 0

### Respiratory Viral Illness Activity: Parainfluenza

Total # of lab confirmed cases this week = 2

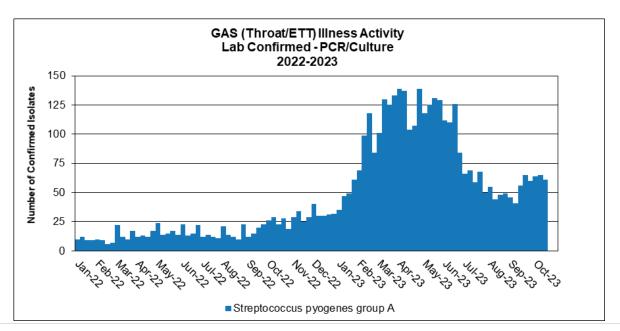

#### GROUP A STREP (THROAT/ETT) GRAPHS

# Group A Strep (Throat/ETT) Illness Activity

Total # of lab confirmed cases this week = 61

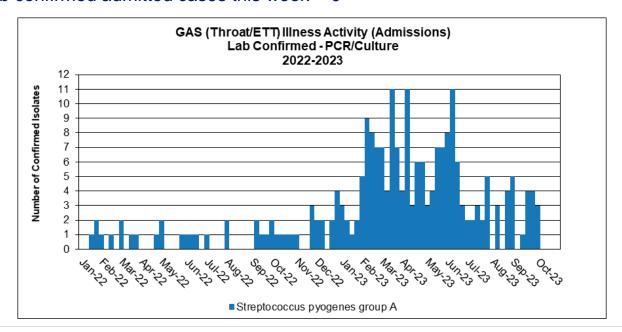

Note: Data includes all positive isolates and therefore may be an over-representation of patients with respiratory illness.

# Admissions: Group A Strep (Throat/ETT) Illness Activity

Total # of lab confirmed admitted cases this week = 0.

Note: Data includes all positive isolates and therefore may be an over-representation of patients with respiratory illness.
