

Cancer Research Network Postgraduate and ECR Cancer Research Symposium

2020 FORMAT

The scientific program for the 2020 Symposium will be on-line, with ~2 hour sessions spread over 3 part-days, the afternoons of Tuesdays the 10th, 17th, 24th November. You will be registering for online participation only and all abstracts submitted will be considered for short oral presentations. The final program and instructions to presenters will be provided after abstract registration closes. Abstract registrations will be accepted until **midnight Sunday 20th September**. Registration to attend as a viewer **will remain open** until the time of the session.

[Registration](#) is free to CRN members. You may become a member [here](#).

It is hoped that a face-to-face networking event will be possible later in 2020. We will supply details on that in the future, if COVID-19 related restrictions permit a live event.

ABSTRACT SUBMISSION GUIDELINES

Eligibility

To be eligible to submit an abstract you must be:

- No more than 2 years postdoc or a current postgraduate cancer research student
- A member of the Cancer Research Network. You may join [here](#).
- The research must be cancer related.

Submitting your abstract

Register for the Symposium to submit your abstract:

https://sydney.au1.qualtrics.com/jfe/form/SV_23vHYWrkESWr27P

Please ensure you have the following details to enter into the Registration and Abstract submission form:

1. Abstract title
2. All authors' first names, last names and their affiliations numbered with the presenting author marked with an asterisk (*).
3. Authors' affiliations, numbered.
4. Your abstract text, **maximum 300 words**. We suggest structuring your abstract with paragraph labels such as: Background, Aim, Methods, Results and Summary/Conclusion
5. Name and email address of your research supervisor (if applicable)

6. A short bio - please provide a few sentences about the focus of your research (max 100 words)
7. Decide the session theme(s) that most closely aligns with your research. When you register you can select from the following themes (you can select multiple themes if relevant):
 - Clinical research and therapy
 - Molecular biology and biomarkers
 - Public health and cancer screening
 - Cell biology
 - Genomics
 - Novel treatments
 - Quality of life and survivorship
 - Psycho-social
 - Imaging / Radiology / Surgery
 - Computational biology / AI / VR / Bioinformatics
 - Cancer immunology and immunotherapy
 - Other
