

Colt Recycling, LLC, an industry leader in processing e-Scrap, is seeking an experienced e-Scrap buyer to join our business development team.

Based in Hudson, NH, Colt is a major player in the business of e-Scrap purchase and recycling. We purchase and process Circuit boards, chips and components, obsolete equipment, base metals, etc.

Our in-house processing capabilities and R2:2013 Certification have created opportunities for continued growth in our business.

Our parent company, Colt Refining, Inc. gives us the capability to refine scrap in-house, and to quantify values in our internal fire-assay laboratory.

Colt seeks one or more experienced professionals to develop additional business to complement our growing processing capabilities.

Colt's compensation package and benefits are among the best in the industry.

Contact John Cianciarulo, General Manger, [JohnC@ColtRecycling.com](mailto:JohnC@ColtRecycling.com)

or see us at the E-Scrap Conference in Florida in September.
